Fixing	4mm., max' diameter

Overview

The RX1 SPACER is an optional extra, providing a low profile mounting base to both the RX1 and RX1K advanced access control readers.

(spacer with RX1 fitted)

Reader Models are sold as customer-specific configurations.

Please call **+44 (0) 1495 751 992** to discuss your custom configuration or LEGIC® reader requirements.

MODEL

RX1 SPACER

The unit replaces the standard backplate to the reader, offering an alternative method of mounting the module, especially when fitting security projects to existing architecture and using 13mm square conduit cable trunking. The spacer also allows a convenient method of fixing the reader to a desktop, or most other plan surface finishes, giving a greater stand-off to the reader module.

The SPACER provides several screw hole fixing points with a defined cable access to the reader, and easier positioning of wiring to the reader's connection terminal.

Made of tough ABS the spacer affords a firm and solid backing to the reader, and gives a professional look to the finished installation.
